## QUICK GUIDE – REPLACEABLE PLASTIC INSERTS

1

Attach the suction cup at the right-hand side of the plastic insert.

2

With help of the suction cup; pull out slightly to release the insert from the profile grooves, and then pull sideways to slide the insert out of the sign row.

3

Place the bottom edge of the plastic insert into the bottom groove of the sign row.

4

Arch the insert slightly and put its left upper corner into the groove's left upper corner. Use your finger to press and slide along the upper edge of the insert to guide it in under the grip of the groove.
